HISTORICAL SUMMARY.

THE early history of the ROYAL COLLEGE OF SURGEONS OF ENGLAND is the history of two Companies, which, existing at first as separate fraternities or guilds, were for a time united into one body corporate, and finally became resolved again into two distinct Corporations. One of these, the Barbers' Company of London, is first definitely mentioned, in the records preserved at the Guildhall, in the year 1308, when Richard le Barber was presented and sworn before the Court of Aldermen as Master and Supervisor of the Barbers' Guild; and from an Ordinance of the City made in the previous year it is evident that the Barbers of London were at that time engaged in the practice of at least some branches of Surgery. The other Company, known as the Fellowship or Guild of Surgeons, is mentioned in the City records in the year 1369, when two Masters were sworn before the Court of Aldermen and given power to report the faults of unskilful Surgeons.

Origin of the College.

The Barbers' Company first mentioned in 1308.

The Surgeons' Guild mentioned in 1369.

Between these two bodies there was for many years a keen rivalry and jealousy. Each tried by turns to attain supremacy of authority and jurisdiction in matters relating to the practice of Surgery. In the year 1376 the Barbers made a complaint to the Mayor and Aldermen against unskilled practitioners in Surgery, and obtained an Ordinance providing that two Masters should be appointed annually to direct and rule the Craft, to inspect instruments, and to see that none should be admitted to the franchise of the City except after attestation of their skill by good examination. Fourteen years later, however, four Masters of the Surgeons' Guild were sworn before the Court of Aldermen, and they were invested with the power of scrutiny among persons practising Surgery and with authority to present defaults. But in the year 1410 the Barbers obtained from the Court of Aldermen confirmation of the privileges granted to them in 1376 with the addition that they should

Barbers' Company assumes two-fold character

The Barbers' Company was by this time assuming a twofold character, for it consisted of two classes of members, those who were Barbers simply or practised only the minor branches of Surgery, such as blood-letting and tooth-drawing, and those who exercised the faculty of Surgery. In the year 1415 the Mayor and Aldermen required the Company to furnish them with a list of all the latter class of members, from which they selected two as Masters of those practising Surgery, leaving to the Company itself the election of the Masters of the Barbers. Meanwhile the Guild of Surgeons sought an alliance with the Physicians. About the year 1423, probably through the influence of Thomas Morstede (a Surgeon who accompanied Henry V. to Agincourt and who was afterwards Surgeon to Henry VI.), they obtained an Ordinance from the Court of Aldermen having for its object an association or Commonalty of Physicians and Surgeons. Fortified by the support of the Physicians, the Surgeons once more challenged the surgical privileges of the Barbers, but these were again confirmed by the Mayor and Aldermen in 1424. The scheme for a combination of Physicians and Surgeons fell through, but the Surgeons continued a separate body with Ordinances for the government of their Society. The volume containing these Ordinances, which were made in the year 1435, is still in existence and is now in the possession of the Barbers' Company.

The Barbers incorporated by Edward IV. in 1462.

Freed from opposition, the Barbers' Company continued to grow in importance, and in the year 1462 the right of its members to practise Surgery was definitely established by LETTERS PATENT granted by EDWARD IV. in the first year of his reign. This Charter, from which the Royal College of Surgeons of England, as recited in the Charter of 1800, dates its constitutional history as a body corporate, was granted to the Freemen of the Mystery of Barbers of the City of London practising Surgery. They were made one Body and Perpetual Community with a Common Seal and with power to hold lands and make Bye-Laws. Provision was made for the annual election of two Masters to rule the Community, to have the scrutiny and government of all persons practising Surgery in London and its suburbs, as well as the supervision of their instruments

and medicines, and to have power to inflict punishment upon offenders by fines, imprisonment and other reasonable means. No person was to be allowed to practise Surgery within the City of London and its suburbs unless first approved by the Masters of the Company. The surgical rights of the Barbers' Company were thus firmly established, and, as testimony to the eminence attained by the Surgeons of the Company, it is worthy of note that the Senior Warden of the Company, when the Charter was granted, was WILLIAM HOBBS, Serjeant-Surgeon to the King—probably the first to hold that office.

In the year 1493 the Guild of Surgeons, which had continued as a separate body, entered into an alliance or "Composition" with the Barbers' Company, by which the two Companies agreed each to appoint two Wardens, the four so appointed to act together in all matters relating to Surgery and to the examination and government of its practitioners.

The Charter granted by Edward IV. to the Barbers' Company was confirmed by Henry VII. and also by Henry VIII., but in 1511 an Act (3 Henry VIII. cap. 11) was passed, constituting a further licensing authority by enacting that no person should practise as a Physician or Surgeon in London, or within seven miles of the same, unless first examined and approved by the Bishop of London, or the Dean of St. Paul's, with the assistance of four Physicians or Surgeons. Two years later, upon the petition of the Guild of Surgeons, another Act (5 Henry VIII. cap. 6) was passed, providing that a limited number of members of the Fellowship (or Guild) of Surgeons, as also of members of the Barbers' Company duly admitted as Surgeons, should be exempt from Constableness and Watch and from bearing arms and serving upon inquests and juries within the City of London.

IN THE YEAR 1540 the two Companies, which had so long been associated by voluntary agreement, were formally united by Act of Parliament, and thus entered upon a new era in their career. The Act (32nd HENRY VIII. cap. 42) after reciting that there were two distinct Companies of Surgeons in London, one called the Barbers of London and the other the Surgeons of London, enacted that the two Companies should from thenceforth be united and made one Body Corporate, to be called by the name of the Masters or Governors of the Mystery and Commonalty of the Barbers and Surgeons of London. The United Company was to enjoy all the rights

and privileges at any time granted to the two separate Companies. Four Masters or Governors, two to be Surgeons and two to be Barbers, were to be appointed annually; barbers were forbidden to perform any surgical operations, except the drawing of teeth, and surgeons were not to exercise the craft of barbering and shaving. Provision was also made for the study of Anatomy by giving the Company the right to claim four bodies annually of persons executed for felony. THOMAS VICARY, Serjeant-Surgeon to Henry VIII. and afterwards to Mary and to Elizabeth, was elected the first Master. The United Company shared the possession of Barbers' Hall, which is known to have occupied its present site in Monkwell Street since 1490 and was probably there even before that. The Hall, subsequently added to by Inigo Jones in 1636, is still standing, having escaped destruction in the Great Fire of London.

Origin of Court of Examiners in 1555.

The Union thus effected was destined to last for more than two hundred years. At first, however, the privileges conferred on the Surgeons of the Company appear to have excited opposition, for in the 34th and 35th years of Henry VIII. an Act was passed allowing unlicensed persons to treat outward sores and swellings with herbs and ointments.

During the reign of QUEEN MARY, in the year 1555, Regulations were drawn up relating to the examination of persons for the Company's licence to practise. These Regulations provided for the appointment of thirteen Examiners, including the Master and two Governors. This is the origin of the Court of Examiners of the Royal College of Surgeons of England, although it was not until the time of Charles I. that the appointment of ten Examiners—the number continued to this day—was provided for by Charter.

Letters Patent of James I. and provisions thereof, 1605.

In the year 1605 the Company obtained a Charter from JAMES I. providing that the Governing Body of the Company should consist of four Masters or Governors, two of whom were to be Surgeons, and twenty-six Assistants. The Company was given power to examine Barbers and Surgeons, and to prohibit ignorant persons, or such as wilfully refused to be examined, from practising.

Letters Patent of Charles I. and provisions thereof, 1629.

In the year 1629 CHARLES I. granted a further Charter to the Company, providing that ten Freemen of the Company should be elected and constituted Examiners of Surgeons in London. No one was to practise Surgery in London, or within seven miles of it, except Members of the College of Physicians, unless examined and approved by the Examiners of the Company, and every person so approved might practise Surgery anywhere

in England. Apprentices were to serve for not less than seven years, to be sound in body and limbs, and to read and understand Latin. The duty was also assigned to the Court of Examiners of examining Surgeons and Surgeons' Assistants for the Royal Navy and Merchant Service and of inspecting their instruments and chests of medicines. This duty they and their successors, the Company of Surgeons and the Royal College of Surgeons, continued to discharge until other arrangements were made at a comparatively recent date.

For many years the union between the two Companies appears to have worked smoothly, but as early as 1684 there were signs that the Surgeons were beginning to find their association with the Barbers irksome and inconvenient. In that year a Petition for the dissolution of the United Company was presented to the King, but the agitation died out, and it was not until many years later that further steps were taken in the matter. The dissatisfaction, however, continued. From the year 1540 the practice of Surgery had been entirely separated from that of barbery, and much progress had been made in surgical skill and knowledge. Under the United Company several of the Surgeons had attained great eminence in their profession, and among these may be mentioned Richard Ferris, Thomas Gale, the two Clowes', Wiseman, Amyand, Cheselden, Sir Caesar Hawkins, and Percivall Pott. The Surgeons resented the presence of Barbers at their examinations, and objected to the signatures of Barbers appearing upon Surgical Diplomas. In 1744 they informed the Barbers that they intended to petition Parliament for the dissolution of the union. The Barbers protested against this, and both parties presented Petitions to Parliament. The Surgeons prevailed, and in the year 1745 an Act of Parliament was passed dissolving the union and establishing two separate Companies. The Barbers were allowed to retain the whole of the Corporate property, real and personal, with the exception of the Arris Bequest and Gale's Annuity for Anatomy Lectures founded in 1646 and 1655 respectively. These Trusts the Act vested in the Company of Surgeons, and they are now administered by the Royal College of Surgeons.

appointed for life, of whom one was to be Master and two Governors or Wardens elected annually, and of whom ten were to be Examiners appointed for life. JOHN RANBY, Serjeant-Surgeon to George II. (whom he accompanied to the battle of Dettingen in 1743), became the first Master of the Company, and upon taking his seat he presented a handsome silver cup, which is still in the possession of the College. The First Wardens were JOSEPH SANDFORD and WILLIAM CHESELDEN. These appointments were made by the Act, which also specified by name the ten Examiners and sixteen Members of the Court of Assistants. The sixteen thus appointed were directed to meet forthwith, and select from the Freemen of the Company five others to complete the number of the Court. Thereafter, the Court were to meet on the first Thursday in July in each succeeding year for the election of the Master and Governors, and to fill up any vacancies, which from time to time might occur from death or resignation among the Examiners and Assistants. In addition to examining Surgeons for the Navy the Examiners were also required to examine all candidates for the posts of Surgeon or Surgeons' Mate in the Army. The Freemen of the Company were to enjoy the same Surgical privileges as approved Surgeons of the United Company had enjoyed under the Act of Union and Charter of Charles I., and, while in the practice of their profession, were to be exempt from all Parish, Ward, and Leet Offices and from serving upon Juries.

The Surgeons had to find a new home, and, after holding their first meetings at Stationers' Hall, eventually secured premises in the Old Bailey and there built Surgeons' Hall, entering into occupation in 1751. Here the business of the Company was transacted until 1796, when the Court of Assistants, finding the building in need of substantial repair and their tenure of the premises secured for not more than fifty-five years, determined to dispose of the property and erect a new building upon a freehold site.

About this time the Company became involved in difficulties in consequence of a provision in the Act of Incorporation which had unfortunately been framed without due regard to possible eventualities. This provision required that the Master and Governors, or any two of them, with nine or more members of the Court of Assistants, should constitute a Court for the despatch of business. On the 7th July, 1796, a meeting was held at which the Master, Mr. Gunning, presided, but at which no Governor was present, one having died in the previous May and the other being too ill

to attend. Consequently it was impossible to obtain a properly constituted quorum. Nevertheless the Court conducted its ordinary business, and among other matters elected Henry Cline to the Court of Assistants. In spite of this technical defect in their constitution, the Court of Assistants continued to transact the business of the Company. They disposed of their property in the Old Bailey and acquired a freehold site in Lincoln's Inn Fields, upon which part of the present building of the Royal College of Surgeons of England now stands. The business of the Company was not suspended. Examinations were held and Diplomas were issued. The Examinations of Surgeons for the Navy and Army were also continued. It became, however, necessary to find some means of removing the legal difficulties which had arisen, and, for this purpose and also with the object of acquiring additional powers and authority, a Bill was introduced into Parliament. The Bill passed through the Commons, but was thrown out in the House of Lords; and after further deliberation it was determined to abandon the Bill and to petition for a Charter from the Crown.

Meanwhile Parliament entrusted to the care of the Company the Hunterian Collection purchased for the Nation at a cost of £15,000. The Collection was delivered to the Company under an Order of the Treasury, dated 28th November, 1799, and in March 1800 the Company was re-incorporated and constituted by the name of the Royal College of Surgeons in London, by Charter granted by George III. In the year 1806 Parliament voted a sum of £15,000, and subsequently a further sum of £12,500, in aid of the erection of a building for the display of the Hunterian Collection. A contribution of £21,000 was at the same time made from the funds of the College, and the Museum was opened to visitors in 1813.

The Charter of the 40th GEORGE III. definitively severed the connexion of the College with the Corporation of the City of London. Members of the College were not entitled to any franchise belonging to the Freemen of the City, but all other privileges and possessions acquired under former Acts and Charters, and not altered by the Charter then granted, were continued and ratified. The Court of Assistants still consisted of twenty-one Members appointed for life with power to fill up vacancies as they might happen, and from them were chosen the ten Examiners, the Master and two Governors or Wardens being selected from these ten. The two principal Serjeant-Surgeons and the Surgeon-

Number of Council increased.

Constitution of Court of Examiners altered.

CHARLES HAWKINS, Serjeant-Surgeon to George III., was appointed the First Master, and WILLIAM LONG and GEORGE CHANDLER became the first Governors. All Members of the old Company of Surgeons, on signifying their acceptance of the Charter, were entitled to become Members of the College, and any person in the future desiring to become a Member was required to pass an examination and obtain "Letters Testimonial of his Qualification to practise the Art and Science of Surgery under the Common Seal of the College." In addition to examining candidates for the Membership, the Court of Examiners were required, as under the former Acts and Charters, to examine all Army and Navy Surgeons, their Assistants and Mates, and to inspect their instruments.

A further Charter, granted by GEORGE IV. in 1822, changed the titles Master and Governors to President and Vice-Presidents, and provided that the Court of Assistants should in future be styled the Council of the College.

No change was, however, made in the constitution of the College until the year 1843, when a new Charter (7th VICTORIA) was obtained, which changed the name of the College to The Royal College of Surgeons of England, and instituted a new class of Members, who were to be called FELLOWS, from and by whom the Council were to be elected. The number of the Council was increased to twenty-four, and, while the existing Members of the Council were allowed to continue in office for life, provision was made that three elected Members should retire annually, so that, when no more life-Members were left, it would not be possible for a Member to retain his seat for a longer period than eight years without re-election.

A great change was also effected by this Charter in the constitution of the Court of Examiners. They were no longer to be necessarily selected from the Council, but any Fellow, whether on the Council or not, was made eligible. The Examiners then in office were to continue for life, but all future Examiners were to hold office only during the pleasure of the Council. The Serjeant-Surgeons and Surgeon-General to the Forces were no longer to have any preference of being admitted Examiners, and the President and Vice-Presidents were not to be chosen

exclusively from the Examiners but from all the Members of the Council indifferently, whether Examiners of the College or not.

The Charter further provided that the President, Vice-Presidents and Members of the Council should be Fellows, and directed them to elect, within three months from the date of the Charter, not less than 250 and not more than 300 Members of the College to be Fellows. They were also given power to appoint other Members to be Fellows within one year from the date of the Charter. With these exceptions no persons were to be admitted to the Fellowship except by examination, nor until attaining the age of twenty-five years. The first Fellows, 300 in number, were chosen mainly from the Surgeons, Assistant-Surgeons and Lecturers of the Metropolitan and Provincial Hospitals. They were elected under one general Diploma on December 11th, 1843. A further election of 242 Fellows took place on the 26th August, 1844, and these included a considerable number of representatives of the Naval, Military and Indian Forces.

Provision for election of the first Fellows.

In the year 1852 further extension of the principle of election to the Fellowship without examination was made by a Supplemental Charter (15th VICTORIA), which enabled the Council to elect Members of fifteen years' standing to the Fellowship, provided they were Members when the Charter of 1843 was enacted. The Council were also empowered to admit annually to the Fellowship, without examination, two Members of the College of twenty years' standing, and authority was given for the *ad eundem* admission to the Fellowship, under certain conditions, of Fellows by examination of the Dublin and the Edinburgh Colleges of Surgeons, and the Faculty of Physicians and Surgeons of Glasgow. This Charter also provided that Members of the Court of Examiners thereafter elected should go out of office at the end of five years, but should be eligible for immediate re-election. Provision was also made for the appointment of a Board of Examiners in Midwifery for testing the fitness of persons to practise Midwifery, and Licences in Midwifery were granted to persons passing the Examinations of the Board until the year 1875, after which the Examinations were discontinued.

Further provision for the election of Fellows in 1852.

In the year 1859 the Licence in DENTAL SURGERY was instituted under the Charter of the 23rd VICTORIA, which empowered the Council to appoint a Board of Examiners for testing the fitness of persons to practise as Dentists.

Enabling Act
of 1875.

In the year 1875 an Act of Parliament was passed to enable the College to associate itself with one or more of the Colleges or Bodies named in Medical Acts for the purpose of conducting joint examinations for qualifications to be registered under the Acts. In pursuance of the provisions of this Act the College subsequently entered into an Agreement with the Royal College of Physicians of London, establishing a CONJOINT EXAMINING BOARD and requiring that all candidates for the Licence of the Royal College of Physicians of London and the Membership of the Royal College of Surgeons of England, commencing professional study after the 1st October, 1884, should pass the Examinations of the Board before becoming entitled to their Diplomas. Thus was constituted the present Examining Board of the two Colleges. The lease of a site on the Victoria Embankment was acquired from the Duchy of Lancaster, and on this an Examination Hall for the Board was erected at the joint expense of the two Colleges. The foundation-stone was laid by QUEEN VICTORIA on the 24th March 1886, and the Hall was first used for examinations in the year 1887.

In the year 1888 a Supplemental Charter was obtained, mainly with the objects of enabling the College to hold lands and hereditaments of a greater yearly value than that previously sanctioned, and of allowing Fellows to record their votes at elections to the Council by voting-papers sent through the Post, instead of by personal attendance at the College, as required up to that time.

The last Charter, obtained by the College in 1899, the 63rd year of Queen Victoria's reign, enables the Council to elect persons, whom they shall deem to be sufficiently distinguished for the purpose, to be Honorary Fellows of the College. These Honorary Fellows, the number of whom must not exceed fifty at any time, are not eligible for the Council or for the Court of Examiners, nor are they entitled to vote at Elections to the Council. Their status is purely honorary and does not confer the right to practise Surgery. At the head of a list of distinguished names the College has the honour to place that of KING GEORGE V. His Majesty, when Prince of Wales, became an Honorary Fellow of the College, and, after ascending the Throne, signified his pleasure to retain the title.

In the year 1908 the Examination Hall on the Victoria Embankment was sold, and a freehold site in Queen Square, Bloomsbury, was subsequently purchased. Upon this site a new Examination Hall has been built by the two Colleges, and since May 1912 the Examinations of the Conjoint Board have been conducted in this building.

SECT. XIV.—EXAMINATION AND ADMISSION OF MEMBERS.

1. No person under the age of Twenty-one years shall become a Member of the College nor unless and until he shall have passed the Examinations for Qualifications to be registered under the Medical Act, held by the Examining Board for the time being constituted under the Scheme and Regulations approved and adopted by the Royal College of Physicians of London on March 12th, 1883, and by the College on April 29th, 1883 (herein called the Joint Examinations), and complied with the conditions relating thereto contained in the said Scheme and Regulations, or

such conditions as may be agreed upon between the College of Physicians and the College for the time being. Nothing contained in this Section shall diminish or affect the right of any person who shall have commenced professional study before the 1st of October, 1884, to be examined for and to receive the Diploma of Member of the College; but such right, where it exists, shall remain and continue, to all intents and purposes, as if this Bye-Law had not been enacted.

2. The Diploma of Member shall be in such Form as the Council may from time to time judge proper.

3. The Seal of the College shall be affixed to the Diploma of every Member of the College.

4. Every person, prior to his admission as a Member of the College, shall, in the presence of an Officer of the College, make and subscribe his name to the following Declaration:—

“I, A. B., do solemnly and sincerely declare, that, while a Member of the Royal College of Surgeons of England, I will observe the Bye-Laws thereof: that I will obey every lawful Summons issued by order of the Council of the said College, having no reasonable excuse to the contrary: and that I will demean myself honourably in the practice of my Profession; and to the utmost of my power maintain the dignity and welfare of the College.”

5. Every person, prior to his admission as a Member, shall subscribe his name to a Copy of the Bye-Laws of the College, in testimony of his having engaged himself to the observance thereof.

6. The fee for the Diploma of Member, exclusive of the fees payable for the Licence of the Royal College of Physicians of London under the Scheme and Regulations for the Joint Examinations, shall be such sum not exceeding Twenty Guineas and shall be payable in such manner and at such times as the Council from time to time direct, and in addition thereto there shall be paid the Stamp Duty, if any, on such Diploma and such reasonable fees for and in case of re-examination as shall be in like manner directed.

7. If the Court of Examiners shall find any circumstance in the Character, Conduct, or mode of Practice of any Candidate for Examination which in their opinion renders such Candidate unfit to be admitted a Member of the College, the said Court shall have the power of declining to examine him until the opinion of the Council shall have been taken thereon.

SECT. XV.—RIGHTS OF FELLOWS AND MEMBERS.

The Council will, at all times, protect and defend every Fellow and Member of the College who may be disturbed in the exercise and enjoyment of the Rights, Privileges, Exemptions, and Immunities, acquired by him as a Fellow and Member or Member thereof.

SECT. XVI.—MISCONDUCT OF FELLOWS AND MEMBERS.

1. If any Fellow or Member of the College shall after due enquiry be judged by the Council to have been guilty of disgraceful conduct in any professional respect, he shall be liable to removal by resolution of the Council from being a Fellow and Member or Member of the College.

2. Should any Fellow or Member of the College be convicted of any Criminal Offence, or have his name removed from the Medical Register by the General Medical Council under Section XXIX. of the Medical Act of 1858, the Council of the College may, if they should consider the offence of which he shall have been so convicted, or for which his name shall have been so removed, to be of such a nature as to render him unfit to remain a Fellow and Member or a Member of the College, remove such Fellow or Member by resolution to that effect, from being a Fellow and Member or a Member of the College.

3. Any Fellow or Member who shall have been removed by Resolution of the Council as aforesaid shall thereby forfeit all his rights and privileges as a Fellow and Member or a Member of the College; and his Diplomas or Diploma shall thereupon be void and shall become the property of the College, and be delivered up by such Fellow or Member to the College on demand, provided that if at any subsequent time the Council of the College by Resolution, and subject to such conditions as they may think proper, rescind any Resolution which may have been passed under any of the preceding Bye-Laws for removing any person from being a Fellow and Member or Member of the College, such rescinding of the former Resolution shall have the effect of restoring such person to the Fellowship or Membership of the College, and such person shall, notwithstanding such removal or forfeiture as aforesaid, but subject to such conditions as the Council may in the particular case see fit to impose, be restored to his rights and privileges as a Fellow and Member or a Member of the College.

SECT. XVII.—MEETINGS OF FELLOWS AND MEMBERS.

1. And any Fellow or Member of the College who may in any manner offend herein shall be liable to be restrained and excluded by the Council from attending any Oration and Lectures at the Theatre, and from any use of or admission to the Library and Museum, and to be suspended from any or all other Privileges which he may have as a Fellow and Member or a Member of the College, for any such period as the Council may adjudge, or to removal by resolution of the Council from being a Fellow and Member or a Member of the College. And every Fellow or Member of the College who shall thereupon be removed as aforesaid shall forfeit all his rights and privileges as a Fellow and Member or a Member thereof.

2. All meetings convened by or under the authority of the President or Council

of the College, as well for general business as for the delivery of Orations or Lectures, or for the distribution of Prizes, shall be under the control and direction of the President or other Member of the Council presiding at such Meeting. And any Fellow or Member of the College who shall interrupt, impede, or interfere with the proceedings at any such Meeting, or shall propose any matter for discussion or debate without the leave of the President or other person so presiding, shall, upon being required by the President or other person so presiding, immediately withdraw from such Meeting; and shall be moreover liable to be restrained and excluded by the Council from attending any Orations and Lectures at the Theatre, and from any use of or admission to the Library and Museum, and to be suspended from any or all other privileges which he may have as a Fellow and Member or a Member of the College, for any such period as the Council may adjudge. HUNTERIAN ORATION.

In the year 1813 Dr. Matthew Baillie and Sir Everard Home, Bart., Executors of John Hunter, "being desirous of showing a lasting mark of respect to the memory of the late Mr. John Hunter," gave to the College the sum of £1684 4s. 4d. Three per cent Consolidated Bank Annuities for the endowment of an annual Oration, to be called the Hunterian Oration, and to be delivered in the Theatre of the College on the 14th of February, the Birthday of John Hunter, by the Master, or one of the Governors for the time being, or such other Member of the Court of Assistants as should be appointed by the Master and Governors or any two of them—such Oration to be expressive of the merits in Comparative Anatomy, Physiology, and Surgery, not only of John Hunter, but also of all such persons, as should be from time to time deceased, whose labours have contributed to the improvement or extension of Surgical Science.

The Endowment was accepted by the College under a Deed of Trust dated the 9th October 1813, containing, amongst others, the following conditions:—That the Fund should be vested in the names of three Members of the Court of Assistants; that £10, part of the interest accruing from the Fund, should be given to the Orator; and that the remainder of the interest should be expended in providing a Dinner, on the day of the delivery of the Oration, for the Members of the Court of Assistants and such other persons as the Master and Governors for the time being should think proper to invite.

In 1853, after consultation with the representatives of the founders of the Trust, it was decided that the Oration should in future be delivered biennially instead of annually.

The fund was re-invested in 1900, and now consists of £1613 18s. India Three per Cent. Stock.

ARRIS AND GALE LECTURES.

The Arris Lectures were founded in 1646 by Mr. Edward Arris, a Member of the Company of Barbers and Surgeons, of which he became Master in 1651. He was also an Alderman of the City of London in that year. He died on the 28th May 1676. His portrait in one picture with a portrait of Sir Charles Scarborough, who was appointed to deliver the Arris Lectures in 1649, is in the possession of the Barbers' Company.

From the Minute Books of the Company of Barbers and Surgeons it appears that on the 24th March 1646 Mr. Edward Arris paid to the Company a sum of £300 "for the use of the new publique Anatomy." This sum was subsequently repaid to Mr. Arris, and in lieu thereof he settled upon the Company an annuity of £30, which shortly before his death he redeemed by the payment of £510. By the Act of Parliament of the 18th George II (1745) for dissolving the Union between the Barbers and Surgeons this sum of £510 was given and vested in the Company of Surgeons then incorporated, and upon the dissolution of that Company became vested in the College. The fund now consists of £426 14s. 6d. Metropolitan Consolidated Three per Cent. Stock.

In the final settlement of the Trust no conditions appear to have been imposed save an understanding that the Anatomy Lectures of the Company were to be continued. By an Act of Parliament passed in 1540 the Company were entitled to claim four bodies annually of persons executed for felony, and to make use of them for the study of Anatomy. The bodies were dissected, and lectures on the muscles and other subjects were given. The Surgeons of the Company were required to attend these lectures and demonstrations, which were called "Public Anatomies." The intention of Mr. Arris was to assist the Company in this work, and the lecturers appointed under this foundation were at first called "Readers of the Muscular Lecture."

Under the Company of Surgeons the Arris Lectures were from 1753 to 1766 delivered by the Masters of Anatomy, of whom the first to be appointed were Percivall Pott and John Hunter. In 1767 the office of Professor of Anatomy was created, and the Arris Lectures were assigned to him.

The Gale Lectures were founded by Mr. John Gale of Bushey, a Member of the Company of Barbers and Surgeons, who, by his Will, dated 13th August 1655, left to the Company an Annuity of £16, payable out of the rents of certain premises on Snow Hill in the City of London, for one Anatomy Lecture in every year to be called Gale's Anatomy.

This Annuity, together with the Arris Bequest, was by the Act of Parliament of 1745 vested in the Company of Surgeons, and upon the dissolution of that Company became vested in the College. In pursuance of Acts of Parliament passed in the 35th and 44th years of George III for the improvement of Snow Hill, the Rent Charge of £16 per annum was purchased by the City of London for the sum of £432, which sum, in accordance with the directions of those Acts, was invested in the name of the Accountant General of the Court of Chancery, until the same shall again be invested in some Real Estate, and the same was laid out in the purchase of £689 16s. 5d. Consolidated Bank Annuities (re-invested in £703 0s. 1d. 2½ per Cent. Consols in 1891), the interest thereof being paid to the College.

The earliest record of a lecture under this Trust is dated 30th June 1698, when it was "ordered that there be an Anatomy Lecture called Gale's Anatomy," and Dr. Havers, well known for his description of the canals in bone, since called Haversian, was appointed the first Reader. The Lecture was afterwards called the Osteology Lecture.

Under the Company of Surgeons the Lecture was at first allotted to the senior Master of Anatomy, and afterwards to the Professor of Anatomy.

At the beginning of the Nineteenth Century, lectures were for a time suspended at the College owing to building operations, but were resumed in 1810. It was then determined that six lectures should be delivered annually under the Arris and Gale Trusts. The lectures were no longer distinguished as "muscular" and "osteological," but were united into one course delivered by a Professor of Anatomy and Surgery. In 1857 the title of the lecturer was altered to Professor of Human Anatomy and Surgery, and in 1868 to Arris and Gale Lecturer. In 1864 the number of lectures was reduced to three. Honorarium for the three lectures, the amount of the dividends received from the Arris Bequest and Gale Annuity—about £29.

ERASMUS WILSON LECTURES.

With the object of promoting the study of the Pathology together with the Anatomy and Physiology, human and comparative, of the Skin and its Appendages, the late Sir Erasmus Wilson gave to the College the sum of £5000 New Three per cent. Consols, under a Deed of Trust, dated the 8th July 1869, to found and endow a Professorship of Dermatology. The Council appointed Sir Erasmus Wilson to the Professorship, and during the period 1870-78 he delivered six lectures annually, and presented to the Museum a large collection of casts and models used in illustration of his lectures.

In 1879 certain alterations in the terms of the Trust were effected with the approval of the Founder, providing that the income derived from the Fund should be devoted to the promotion of original researches by lectures delivered at the College, the number of such lectures not to exceed three in any one year, and to be given by one or more persons to be called Erasmus Wilson Professors of Pathology.

In 1881 further alterations were thought desirable, and under a new Deed of Trust, dated the 13th April 1882, it is now provided that the income of the Fund shall be appropriated in part towards the payment of the salary of a Pathological Curator of the Museum, and in part for the payment of Lectures on the Pathological contents of the Museum to be delivered by the Pathological Curator or some other person appointed for the purpose with the title of Erasmus Wilson Lecturer. Three lectures were delivered annually from 1882 to 1908. In July 1908 it was decided to institute a series of Lectures or Demonstrations on advanced Surgical Pathology, illustrated by specimens in the Museum, and the Erasmus Wilson Lectures now form part of this Series. Six Demonstrations are given annually. Honorarium £30.

In 1900 the fund was re-invested in £4731 13s. Metropolitan Consolidated Three per Cent. Stock, and this amount has since been increased to £5250 by the investment of an unexpended income balance accumulated mainly in the early years of the Trust.

BRADSHAW LECTURE.

The Bradshaw Lecture was founded in memory of her husband by the late Mrs. Sally Hall Bradshaw, widow of Dr. William Wood Bradshaw, M.A.Oxon., D.C.L., LL.D., a Fellow of the College for many years in practice at Reading. She bequeathed to the College by Will, dated 6th September 1875 and proved 26th August 1880, a sum of £1000 Three per Cent. Consols, the income thereof to be expended upon a lecture on Surgery to be called "The Bradshaw Lecture," and to be delivered annually on the 18th August, the anniversary of Dr. Bradshaw's death.

In 1882 an Order of Administration of the Bequest was obtained from the Charity Commissioners, which provided that the Lecture should be delivered on the 18th day of August, or on such other day as might be expressly substituted in each year for that day by the President, and a sum of £900 Three per Cent. Consols was transferred to the College in satisfaction of the Bequest. The fund was re-invested in 1900, and now consists of £851 14s. 3d. Metropolitan Consolidated Three per Cent. Stock. Honorarium of Lecturer, about £24.

TRIENNIAL PRIZE AND JOHN HUNTER MEDAL.

This Prize was founded by the Court of Assistants in the year 1820, and was first offered for competition in 1822. The honorarium, which is provided from the funds of the College, at first amounted to Thirty Pounds, but in 1840 was increased to Fifty Guineas.

In 1864 a life-size statue of John Hunter by H. Weekes, R.A., was erected in the Museum of the College by public subscription, and with the residue of the subscriptions the Statute Committee founded the John Hunter Medal, which in the year 1867 they entrusted to the College upon the following conditions, viz. :—
 “That the Medal be awarded to the Author of the Dissertation to which the Collegial Triennial Prize shall from time to time be adjudged on condition that the College, having entrusted to it the custody of the Medal does for ever and to be used only for the aforesaid purpose, do promise and engage to have such Medal struck at its own proper cost.”

The Prize now consists of the John Hunter Medal executed in Gold to the value of Fifty Guineas, or, at the option of the successful Author of the Dissertation, of the said Medal executed in Bronze with an honorarium of Fifty Pounds.

BLANE MEDALS.

This Medal was founded by Sir Gilbert Blane, Bart., F.R.S., a distinguished physician, best known for the sanitary reforms which he effected in the Navy, and the success of the measures which he introduced for the prevention of scurvy.

Under a Deed of Trust, dated the 13th March 1830, he transferred to the College the sum of £300 three per Cent. Consolidated Bank Annuities to provide for two Gold Medals to be conferred once in every two years on two Medical Officers of the Royal Navy “who in the time required shall have delivered to the proper office Journals evincing the most distinguished proofs of skill, diligence, humanity, and learning in the exercise of their professional duties.” The Journals were to be submitted for adjudication to the President of the Royal College of Physicians of London, the President of the Royal College of Surgeons of England, and the Senior Medical Commissioner of the Royal Navy (Director-General of the Medical Department of the Navy).

In 1913, in pursuance of authority given to them under the Deed, the Presidents of the Colleges and the Director-General of the Medical Department of the Navy decided, with the approval of the Lords of the Admiralty, to make certain alterations in the Regulations for the award of the Medals, and it is now provided “that

one Medal be awarded annually to the Medical Officer who obtains the highest aggregate marks at the examination for promotion to the rank of Staff Surgeon, now held twice a year in connection with the Courses at the Medical School of the Royal Naval College, Greenwich—the award to be subject to the approval of the Presidents of the Colleges of Physicians and Surgeons respectively, and the Director General of the Medical Department of the Navy.”

The fund has been re-invested, and at the present time consists of £300 Metropolitan Consolidated $3\frac{1}{2}$ per cent. Stock.

1827. Mr. Henry Cline bequeathed to the College, on trust, such an amount of his Three per cent. French Rentes as should at the time of his death produce £600 per annum, the dividends thereof to be received by his children, grandchildren, and great grandchildren, and after the death of the survivor of them, to be applied to the improvement of the Science of Surgery in such manner as the Council of the College should from time to time direct. In satisfaction of this Bequest a Rente of 15,000 francs per annum was entered in the Books of the Bank of France. One great grandchild, the Countess Rignon, survives.

1902. Mr. James William Groves bequeathed to the College by Will $\frac{3}{4}$ ths of his residuary estate, subject to the life-interests therein of his wife, Mrs. Florence Mary Jane Groves, and his sister, Miss Frederica Harriet Groves, for the general purposes and objects of the Museum (including in such purposes and objects the purchase of collections or the defraying of the expenses of the Conservator incurred in journeys abroad for the inspection of other Collections). It is expected that the sum ultimately placed at the disposal of the College under this Bequest will amount to about £30,000.

I. Annual Meeting of Fellows and Members.

THIS Meeting was held on Thursday, the 20th November, 1913, at 3 o'clock P.M.

In the absence of the President in America the Chair was taken by Mr. G. H. Makins, C.B., Vice-President. Twenty-two Fellows, of whom twelve were members of the Council, and 50 Members attended the meeting.

Mr. Makins placed before the meeting the Report of the Council for the period from the 1st August 1912 to the 1st August 1913, copies of which had been circulated to 907 Fellows and 2669 Members, and made a statement regarding some of the matters which had come under the consideration of the Council during the year.

The following Resolutions were carried :—

I. Moved by Dr. J. Brindley James, seconded by Dr. Sidney C. Lawrence, and carried *nem. con.* (37 voting) :—

That this twenty-ninth Annual Meeting of Fellows and Members again affirms the desirability of admitting Members to direct representation on the Council of the College, which as now constituted, only represents those Members who also hold the Fellowship; and that it does so, in order that the constitution of the Council of the Royal College of Surgeons of England shall be in keeping with modern ideas of true representation.

II. Moved by Dr. A. S. Morton, seconded by Dr. Josiah Oldfield, and carried *nem. con.* (12 voting) :—

That this Meeting of Fellows and Members requests the Council to include in their next Annual Report a Balance Sheet, showing fully and without reserve the assets and liabilities of the College on Midsummer-day, 1913.

III. Moved by Dr. Josiah Oldfield, seconded by Dr. Sidney C. Lawrence, and carried *nem. con.* (10 voting) :—

That this Annual Meeting of the Royal College of Surgeons places on record that it is not satisfied with the administration of the College finances as carried out by the Council, and resolves that such steps as are within its power to take, if any, shall be taken by this Annual Meeting to remedy the same, and that if it has no power, that the steps be taken to secure for it the necessary authority.

The following Motion, of which Dr. W. G. Dickinson had given notice, was not put, it being found upon a count that the required quorum of 30 Fellows and Members was not present :—

That this Meeting, in view of the unsatisfactory nature of the Regulations governing the conduct of the Annual Meetings, and of the small attention given to the Resolutions agreed to, calls upon the Council to summon a Statutory Meeting of the Corporation within the next six months, in order to consider whether the Annual Meetings shall be continued under present conditions.

The three Resolutions carried at the Meeting were considered by the Council at their meeting in December.

With regard to Resolutions Nos. I. and II. the Council decided to take no action. A Resolution in the terms of No. I. has been brought forward at the last four Annual Meetings of Fellows and

Members, and Resolution No. II. is the same as one carried at the Annual Meeting in 1911.

As regards Resolution No. III. the Council are of opinion that the satisfactory financial position of the College at the present time is sufficiently evident to any Fellow or Member who studies the published accounts.

II. Direct Representation of Members on the Council.

At the meeting of the Council in March the following Motion, of which notice had been given in February, was proposed and seconded :—

That, in the opinion of the Council, the time has arrived when steps should be taken to enable Members of the Royal College of Surgeons of England to vote for the election of a limited number of Members of the Council.

After a prolonged discussion a vote was taken, and the Motion was negatived by a large majority.

III. Medical Officers of Health.

In February the Council were asked to take part in a deputation to the Government on the position of Medical Officers of Health as regards security of tenure and superannuation.

The Council declined the invitation to take part in the deputation, but requested the President to consult with some representatives of the Society of Medical Officers of Health regarding the questions at issue.

A conference was accordingly held at the College between the President and Vice-Presidents and the following Medical Officers of Health :—Mr. Herbert Jones, of Hereford, Hon. Secretary of the Society of Medical Officers of Health, Mr. F. E. Freemantle, F.R.C.S., of Hertford, Professor Bostock Hill, of Birmingham, Mr. H. H. I. Ritchon, M.R.C.S., of Heywood, Lancs., and Dr. R. A. Dunn, M.R.C.S., of Hertford.

The result of the conference having been reported to the Council, it was decided to address the following letter to the President of the Local Government Board :—

THE attention of the Council of the Royal College of Surgeons has been directed to the desire of the Medical Officers of Health under the Local Government Board to secure *Fixity of Tenure* and some definite system of *Superannuation and Pensions*, and they have been asked to support the endeavour which is now being made to bring this matter under the consideration of His Majesty's Government.

The Council are aware that this is no new question, and that it may be considered from more than one point of view. They have endeavoured to make themselves acquainted with the arguments put forward on both sides, and the facts as far as they have been able to ascertain them.

Though feeling a special interest in the Diplomates of the College, the Council recognize that, if the request cannot be supported on public grounds, it is not worthy of consideration. It is to this point of view therefore that they have exclusively directed their attention.

It appears to the Council that there must be something wrong with a system under which the guardians of the public health hold appointments terminable at short notice under those whose interests are likely to be interfered with by the exposure of unsanitary conditions, or the suggestion of sanitary improvement. Yet this is what the present system in many districts involves. The Council have been impressed by the confession of men occupying important positions that they are conscious of being influenced in the discharge of their duties by the fear of losing their appointments.

Moreover it is often stated that the Medical Profession is becoming more and more alive to the unattractiveness of Public Health appointments, even those commanding good salaries, where the tenure is insecure and there is no system of superannuation. It appears likely, therefore, that the quality of the applicants for them will deteriorate.

Considering the vital importance of the matter at stake, the Council, whilst fully recognizing the weight of the arguments adduced against the proposed change, which they have endeavoured to consider impartially, cannot think that these are strong enough to outweigh those in favour of the request of the Medical Officers of Health.

The Council, therefore, feel that it would be for the advantage of the community if security of tenure, with a corresponding system of superannuation, were granted to Medical Officers of Health under the Local Government Board, and they venture to express the hope that it may be possible for His Majesty's Ministers to give favourable consideration to the representations which are now being made to them on these questions.

IV. National Health Insurance Act.

Much dissatisfaction has been felt by medical men with regard to the employment of non-qualified persons for the purpose of medical treatment under the National Health Insurance Act, and protests have been made by some of the Medical Corporations.

The following protest was submitted, on behalf of this College, to the National Health Insurance Commission (England):—

THE attention of the Royal College of Surgeons of England has been directed to the National Health Insurance (Medical Benefit) Regulations (England) 1913—Part IV., Par. 2, Clause 44—which opens with the words :—

“Where an insured person contracts with a person other than a duly qualified medical practitioner.”

The Council view with grave concern the recognition by the National Health Insurance Joint Committee and the Insurance Commissioners of Practitioners other than those who are duly qualified.

Such recognition appears to the Council to be opposed to the letter and the spirit of Clause 15, Par. 1., of the National Insurance Act, 1911, which enacts that :—

“Every Insurance Committee shall, for the purpose of administering the Medical Benefit, make arrangements with duly qualified medical practitioners in accordance with the regulations made by the Insurance Commissioners.”

In view of the prolonged and successful efforts which have been made to improve the standard of medical practice, and to protect the Public from the impositions of unqualified persons and from the dangers involved in resorting to them, the Council consider it a retrograde step of a very serious nature to recognize unqualified practitioners, and one which involves a real injustice to those who are duly qualified.

The Council therefore express the hope that the powers assumed under the clause referred to will not be used.

The following reply has been received :—

NATIONAL HEALTH INSURANCE COMMISSION (ENGLAND),
Buckingham Gate,
London, S.W.
8th July, 1914.

SIR,

In adverting to your letter of the 11th ultimo, I am directed by the National Health Insurance Commission (England) to express their regret that owing to exceptionally high pressure of work it has not been possible for them to cause an earlier reply to be sent ; and, with regard to the matters to which you allude in your letter, to invite your attention to the following considerations.

With regard to the statement in the second paragraph of your letter that your Council view with grave concern “the recognition by the National Health Insurance Joint Committee and the Insurance Commissioners of practitioners other than those who are duly qualified,” I am to point out that the Joint Committee and this Commission, so far from giving any “recognition” as a practitioner to any person who is not qualified under the Medical Acts, expressly recognise, in the phraseology of the Regulation which forms the subject of your letter, that no person has any

status in the medical profession unless he is so qualified, and that a person not so qualified can be accurately described only by the term "a person other than a duly qualified practitioner"—the phrase actually used in the Regulations. The fact that certain persons, among them certain insured persons, may prefer of their own choice and on their own responsibility to consult an unqualified person rather than a qualified practitioner is not of course a matter within the control of the Joint Committee or this Commission; and the fact that the Joint Committee and the Commission have made Regulations governing merely the procedure to be followed in cases where an insured person desires to exercise such a personal choice does not imply any recognition on the part of the Department of any professional status in the unqualified person so selected.

With reference to the contention in the third paragraph of your letter that the terms of Section 15 (1) of the Act of 1911, requiring Insurance Committees "to make arrangements with duly qualified medical practitioners in accordance, etc.," should be so interpreted as entirely to prevent any insured person who may desire to obtain treatment from a person who is not a qualified practitioner from obtaining such treatment, I am to remind you that sub-section (3) of Section 15 of the Act expressly requires the making of Regulations by the Commissioners which will authorise Insurance Committees, in cases where they think fit, to allow an insured person to make his own arrangements for treatment, *in lieu of* receiving medical benefit under the normal arrangements made by the Insurance Committee under sub-section (1) with qualified practitioners undertaking service on the panel. No arrangements for treatment by unqualified persons can be made otherwise than under sub-section (3); and since arrangements under sub-section (3) are expressly stated by the Statute to be in lieu of those made under sub-section (1), it is clearly natural that divergencies should be apparent between the arrangements made under the two different Sections, and such divergencies cannot, therefore, be regarded, as is suggested in your letter, as implying any departure from legislative intention.

Indeed, it was made quite clear in Parliament, before the Bill of 1911 reached the Statute Book, that the clause which is now Section 15 (3) of the Act, while making provision for insured persons desirous of arranging individually for treatment by a qualified practitioner not on the panel, was not drawn to exclude the possibility of insured persons making their own arrangements for treatment with unqualified persons, provided that the Insurance Committee to which an application for such permission was made decided to grant the application and to allow the arrangements in that individual case. I am to invite your attention to the enclosed statements by Ministers in Parliament making it plain that an insured person desirous of obtaining treatment from a herbalist or from any other person not qualified under the Medical Acts would not be precluded from so doing, provided that the Insurance

Committee concerned gave its consent to the insured person's application.

In these circumstances you will see that the effect of the particular Regulation to which you call attention is not as stated in your letter, but is merely to lay down the procedure to be followed by an Insurance Committee which has decided, under Section 15 (3) of the Act, to grant an application by an insured person for leave to make his own arrangements for treatment with an unqualified person. The Regulation, in fact, so far from conferring on an Insurance Committee any new right, not provided by the Statute, of allowing an insured person to make his own arrangements with an unqualified person, is designed to secure that, as suggested by the General Medical Council, there shall be no possibility of confusion between arrangements made under Section 15 (3) with qualified practitioners and arrangements made under the same sub-section with unqualified persons, but that the distinction shall be made clear in every case.

In conclusion, I am to refer you to paragraphs 422 to 424 of the Report on the administration of National Health Insurance during the past year, which has just been published by this Commission. A copy of these paragraphs is enclosed herewith.

I am, Sir,

Your obedient Servant,

JOHN ANDERSON.

SIR RICKMAN J. GODLEY, Bart.,
President of the Royal College of Surgeons of England,
Lincoln's Inn Fields, W.C.

V. Royal Commission on Venereal Diseases.

Mr. F. Richardson Cross, Consulting Ophthalmic Surgeon, Bristol Royal Infirmary, and President of the Ophthalmological Society of the United Kingdom, Mr. D'Arcy Power, Surgeon to St. Bartholomew's Hospital, and Mr. S. G. Shattock, Pathological Curator of the Museum of the College, were appointed by the Council to give evidence before the Royal Commission on Venereal Diseases.

Mr. Cross gave evidence regarding the effects of syphilis upon the eyes, Mr. Power upon the general effects of syphilis, and Mr. Shattock on the remote pathological effects of syphilis: the Wassermann test as applied to the diagnosis of the later effects of syphilis, and the latent distribution of syphilis.

VI. Committee on Factory Lighting.

Mr. F. Richardson Cross attended at the Home Office on January 29th, and gave evidence before the Committee on Factory Lighting, as requested by the Council.

In support of his evidence Mr. Cross was able to lay before the Committee answers to a letter circulated by him among members of the Ophthalmological Society bearing on the questions under consideration.

VII. Central Midwives Board.

Mr. C. H. Golding-Bird, who has been reappointed a member of the Central Midwives Board under Section 3 of the Midwives Act, submits the following report of the proceedings of the Board:—

MR. PRESIDENT AND GENTLEMEN,

As there has been no modification of the present Midwives Act, and as no New Midwives Act has been passed by Parliament during the past year (1913), the various matters which have been referred to in previous reports, requiring legal attention, still remain as hitherto.

The *personnel* of the Board remains unchanged, with the exception of the appointment of Sir Shirley Murphy as representative of the Incorporated Midwives Institute in the place of Dr. Herman, whose resignation the Board has received with much regret.

The statistics for the past year are as follows:—

No. of Board Meetings	24
No. of Names on Midwives Roll December 31 ..	37,019
No. passed Examination	2,109

PENAL CASES.

Struck off	70
Sentence adjourned for 6 months	10
Censured	9
Cautioned	4
No action taken.....	3
	— 96
No. who resigned voluntarily	76
No. of Recognised Training Schools.....	85
No. of Recognised Teachers	146
No. of registered medical practitioners approved for practical training	17
No. of Midwives approved for practical training.	129

The great increase in the number of Midwives in the past year—37,019 as against 35,210 in 1912—is worthy of notice: yet this

does not represent the number that still could be made use of in carrying out the beneficent intentions of the Act ; nor should the numbers annually struck off the Roll be taken to mean necessarily that all have proved grossly inefficient, or guilty of heinous offence. A large number of these women are removed from the Roll because of their continued failure to fulfil the Board's requirements, owing to increasing age and their inability to be taught such technicalities as the use of the clinical thermometer, through their defective early education, the revised rules making the correct taking of temperature compulsory.

Many of these women belong to the class who were admitted without examination, and their loss cannot be regretted ; for the sooner these midwives are replaced by those who have submitted to examination, the more thoroughly will the poor women of the country be looked after.

The Board has observed with great satisfaction the more widespread desire of the various Local Supervising Authorities to bring to book offenders against the rules ; and beside thus aiding in purging the Roll of undesirable persons, it would appear from the lessened number of Penal cases—96 as compared with 135 in 1912—that this activity of the Local Authorities is a wholesome warning to midwives to adhere strictly to the letter of the law.

The subject of the National Insurance Act in its relation to the Board was fully discussed in the last Report (though strictly belonging to the current year) for reasons therein given ; but as questions on this subject from time to time are addressed to the Board, a mention of these, as also of other matters interesting to the Profession, will not be out of place. Some questions clearly show that the powers of the Board are even now not universally understood.

Early in the year the M. O. H. for Leicester suggested that a midwife's remuneration should be made a first charge upon the patient's Maternity benefit ; and the Board's reply necessarily was that it had no power to deal with the payment of Midwives.

A letter was received from the Clerk of the Kent Insurance Committee calling the attention of the Board to a difficulty experienced by midwives in getting medical help in cases of emergency for women entitled to medical benefit, and stating that the fees payable to medical practitioners under the Insurance Commissioners' regulations were regarded as inadequate and that the doctors also disapprove of its being left to the midwives to determine when it was necessary for a doctor to attend during the after-treatment.

It was resolved that the Kent Insurance Committee be informed that the Board has no power over the assignment of fees under the Insurance Act, and that the responsibility of advising medical aid is laid upon the midwife by the Rules.

A communication was also received from " the Secretary of the

Wigan and District Guild of Midwives, calling attention to the frequent cases of midwifery practice by uncertified women in the Borough of Wigan.

It was resolved that the Secretary of the Wigan and District Guild of Midwives be informed that an amendment of the Midwives Act Section 1 (2) is highly desirable, and that the Board has made repeated suggestions to this effect.

In a similar complaint from Carnarvon the reply was that the Board has no power over women not on the Roll: and that a copy of the correspondence would be forwarded to the Privy Council.

Information was sought as to the payment of Disablement Benefit on the certificate of a midwife, and it was resolved to reply to the writer that the Board has no jurisdiction to regulate payments under the Insurance Act, but will forward her letter to the Privy Council and the Insurance Commission for them to deal with.

It was resolved further, that it seems somewhat hard to the Board that a woman entitled to Disablement as well as to Maternity Benefit in respect of a confinement should be obliged to procure the signature of a medical practitioner when she has exercised her option and has put herself under the care of a midwife.

A letter was received from the Medical Officer of Health for the County of Durham asking the opinion of the Board as to whether an uncertified person attending a woman in her confinement in company with a registered medical practitioner, and afterwards alone attending the mother for ten days without supervision from the medical practitioner, was guilty of an offence under Section 1 (2) of the Midwives Act, 1902.

After much discussion it was resolved:

That the Medical Officer of Health for the County of Durham be informed that under the circumstances described by him the uncertified woman appears to have acted as a monthly nurse and not as a midwife.

The vexed question, referred to in an early Report, of the interpretation to be put on the words of the Act "habitually and for gain" as applied to an uncertified woman charged with having attended a confinement, and whose plea is that she acted in an emergency, has again been brought to the notice of the Board in a letter from the Clerk of the Cheshire County Council, forwarding an extract from the Minutes of a Meeting of the County Council, held on February 13, 1913, with reference to proceedings contemplated against an uncertified woman practising as a midwife.

It was resolved that the Clerk of the Cheshire County Council be informed that an amendment of the Midwives Act by the omission of the words "habitually and for gain" is highly desirable, that the Board has made repeated suggestions to this effect, and that if this were done prosecutions under the Act would probably be undertaken within the time limit of the Summary Jurisdiction Act.

The increasing interest in the work of the Board taken by the various Local Authorities, is further brought out by the numbers, given in the statistical table, of the offenders called upon to explain their conduct.

This last year 10 offenders had their sentences postponed for six months as compared with 6 in 1912. The desire and endeavour of the Board is to be as lenient as possible with these women; but this leniency can only be exercised, in many cases, where the Local Authorities can be depended on to supervise and even instruct the midwives referred back to them. The Local Authorities are asked to keep special watch upon such cases and to report on their behaviour and their methods of practice after 3 and 6 months; and on these reports the Board determines whether to give the women a further chance, or proceed at once to remove their names from the roll.

It is most satisfactory to be able to state that the number of midwives the Board is able by this means to retain on the Roll is decidedly on the increase.

I beg in conclusion, Mr. President and Gentlemen, to express my gratitude to you for having continued to entrust me with the responsibility of representing the Council of the Royal College on the Central Midwives Board, although I have retired from the Council in due course.

I have the honour to remain,

Yours very faithfully,

C. H. GOLDING-BIRD.

*To the President and Council of the
Royal College of Surgeons of England.*

VIII. American College of Surgeons.

The first Annual Congregation of the American College of Surgeons at Chicago on the 13th November, 1913, was attended by the President, Sir Rickman J. Godlee, Bart., and the following Address of Congratulation was presented:—

(Arms)

We, the Council of the Royal College of Surgeons of England, have heard with much interest of the approaching inauguration of the American College of Surgeons. We hereby convey to it our hearty good wishes, and express the hope that it may have a successful career and fill a position beneficial alike to the Profession and to the Community.

We cannot forget the important advances in the Science and Art of Surgery achieved by many distinguished Surgeons in the Continent of America during the past, and are proud to have enrolled upon our list of Honorary Fellows the names of some of the most active workers in these fields at the present day.

In accepting the invitation for our President to take a part in the opening Ceremony we desire to show that we appreciate the intention of the American College to strengthen the bonds that already unite the Medical Profession amongst English speaking peoples. It is a sentiment which always meets with a cordial response in this Country, and it is one which this College will endeavour to support by all the means in its power.

In witness whereof we have caused the Common Seal of the College to be hereunto affixed this 9th day of October, 1913.

XVII. Finance.

INCOME.

The gross income of the College, exclusive of the income from Trust Funds, amounts to £26,833, an increase of £819 on the amount for the previous year.

The gross receipts from the Conjoint Examining Board amount to £11,839, and the net receipts to £5,441. There is an increase of £183 in examination and diploma fees for the Membership, of £43 in fees for the Diploma in Public Health, and of £104 in the

sum derived from hire of rooms, as regards the share apportioned to this College in each case.

In the fees for the Fellowship there is an increase of £463, while as regards the fees for the Licence in Dental Surgery there is a decrease of £97.

The receipts from investments are £54 more than in the previous year in the case of the General Funds, and £6 more in that of the Erasmus Wilson Bequest.

EXPENDITURE.

The expenditure in respect of revenue for the past year amounts to £21,425, and is £836 less than in the previous year.

In the expenditure of the Conjoint Examining Board a reduction in the expenses at the Examination Hall amounting to £280 has to be noted.

The expenses of the Fellowship and Dental Examinations, if to them are added in equal shares the sundry examination expenses, amount to £2,712 and £1,467 respectively, leave a credit balance of £809 derived from the Fellowship and of £1,747 from the Licence in Dental Surgery.

The general working expenses of the College in Lincoln's Inn Fields are £96 more than in the previous year, but do not include any unusual items of large amount.

The special expenses of the Museum are £177 less than in the previous year, and this year's total of £3,541 more nearly approaches the sum which is likely to become the average expenditure of this department, when the re-arrangement of the Museum is completed.

The special expenses of the Library are £16 less than in the previous year. In that year a sum of £110 was expended on furniture and fittings, but this year there has been no expenditure for that purpose. It may, however, be noted that, probably for the first time, the year's expenditure on books has reached the figure of £1,000.

The Extraordinary Expenditure, though reduced by £441, is still considerable, amounting to the sum of £805. It seems probable that there will be a further reduction under this head in the ensuing year.

TRUST FUNDS.

In the printed statement of accounts the receipts and expenditure in connection with the Trust Funds are placed this year in a separate account, and the unexpended income balances are shown.

In the case of the Erasmus Wilson Fund it was found, from an examination of the accounts of the Fund since its institution in 1869, that a sum of £430 8s. 6d. had been accumulated during the early years of the trust, when the full income was not expended, and by the investment of this sum together with refunded Income Tax amounting to £24 16s. 0d., and a sum of £1 12s. 5d.

taken from current income, the capital of the Fund has been increased from £4,731 13s. 0*d.* to £5,250 Metropolitan Consolidated 3 per cent. Stock.

The capital of the Fund for Sir Gilbert Blane's Naval Medals has also been increased to £300 Metropolitan Consolidated 3½ per cent. Stock by the purchase of £13 4s. 1*d.* additional stock.

The dividends on the Walker Fund, disbursements from which are made not more than once in five years, have as usual been invested to increase the capital of the Fund.

GENERAL REMARKS.

The balance on the Revenue Account amounts this year to £5,407 19s. 4*d.* To this should be added £847 0s. 11*d.* brought forward from the previous year and £161 4s. 1*d.* representing the balance on the Trust Funds' Account, making a total of £6,416 4s. 4*d.* Of this total a sum of £575 has been used for the final payment on the new Examination Hall, and a sum of £4,564 5s. 0*d.* has been invested, leaving £1,276 19s. 4*d.* to be carried forward.

It is satisfactory to note that, after a long period of depression, the total capital value of the securities held by the College has appreciated during the year to the extent of £1,819.

While it is evident that the College is in a good financial position at the present time, it is most important to add to its invested funds for several reasons. Among these may be mentioned:—(1) the insecurity of the income derived from examination and diploma fees; (2) the continued increase in rates and taxes; (3) the growth of the Museum and Library and consequent increase in cost of up-keep; (4) the probability that, in course of time, it will become necessary to make extensive additions to College buildings, at a large capital outlay, to provide further accommodation for the Museum and Library.

XVIII. Issue of Diplomas.

XIX. Retirement of Prosector.

Mr. William Edward Pearson has retired from the post of Prosector to the College after a service of 58 years.

The following resolution expressing appreciation of his services was unanimously adopted by the Council :—

That the Council desire to express to Mr. William Pearson, upon his retirement from the post of Prosector, their high appreciation of his services to the College during a period of 58 years.

The Council believe that the many preparations added to the Museum as the result of his work are justly counted amongst the most treasured possessions of the College, and that they will stand as a lasting record of his exceptional skill and industry.

Mr. Henry Cecil Wilson, who has worked in the Museum for some years, latterly as Assistant Prosector, has been appointed Prosector.

XX. Requisition for Meeting of Fellows and Members.

At their meeting on July 30th, 1914, the Council received a requisition, signed by 51 Members, for a Meeting of Fellows and Members to be held in October for the following objects :—

1. To consider a scheme by which the various examining bodies in surgery in England shall all have a similar standard of examination and a similar diploma.
2. To appoint a Committee, composed equally of Fellows and Members, to consider and formulate such a scheme.
3. To consider the question of a State Medical Service, and how far such a service would affect surgeons in general practice.
4. To appoint a Committee, composed equally of Fellows and Members who are in general practice, to consider the subject, to call evidence, and report thereafter to the Council.

In reference to this requisition it was resolved :

That the Members signing the requisition be informed that there will be a meeting of Fellows and Members in November, at which they will have the opportunity of bringing forward matters for consideration, if they so desire.

THE MUSEUM.

THE Hunterian Collection, which forms the basis, and still a large proportion, of the contents of the present Museum of the Royal College of Surgeons of England, was originally arranged in a building which its Founder, John Hunter, erected for it in 1784, behind his house in Leicester Square.

John Hunter died October 16th, 1793, aged 65. By his will he directed the Museum to be offered in the first instance to the British Government, on such terms as might be considered reasonable, and in case of refusal to be sold in one lot, either to some foreign state, or as his executors might think proper.

In the year 1799 Parliament voted the sum of £15,000 for the Museum, and an offer of it being made to the Corporation of Surgeons, it was accepted on the terms proposed by Government*.

In 1806 the sum of £15,000 was voted by Parliament in aid of the erection of an edifice for the display and arrangement of the Hunterian Collection; a second grant of £12,500 was subsequently voted, and upwards of £21,000 having been supplied from the funds of the College, the building was completed in Lincoln's-Inn-Fields, in which the Museum was opened for the inspection of visitors in the year 1813.

In consequence of the large number of additions, this building became too small for the adequate display and arrangement of its contents; and more space being at the same time required for the rapidly increasing Library, the greater portion of the present building was erected, wholly at the expense of the College, in 1835, at

* The following are the Terms and Conditions on which the Hunterian Collection, purchased by Parliament, was delivered to the late Corporation of Surgeons; which Corporation having become dissolved, the Members thereof were re-incorporated by Charter, dated the 22nd day of March, 1800, under the Title of The Royal College of Surgeons in London:—

1st. The Collection shall be open Four Hours in the Forenoon of two days every week for Inspection and Consultation of the Fellows of the College of Physicians, the Members of the Company of Surgeons and Persons properly introduced by them; a Catalogue of the Preparations, and a proper Person to explain it, being at those times always in the Room.

† 2nd. That one Course of Lectures, not less than twenty-four in number, on Comparative Anatomy and other subjects, illustrated by the preparations, shall be given every year by some Member of the Company.

3rd. That the Preparations shall be kept in a state of Preservation, and the Collection in as perfect a state as possible, at the Expense of the Corporation of Surgeons, subject to the annual Inspection and Superintendence of the Trustees.

4th. That there shall be a Board of Trustees, to consist of sixteen (increased to seventeen by the Lords of the Treasury in 1856) Members, by virtue of their Public Offices, and of fourteen others, to be appointed, in the first instance, by the Lords of the Treasury, and afterwards to be elected, as Vacancies may happen, by a Majority of the remaining Trustees.

5th. That the Museum shall always be open for the Inspection of all or any of the said Trustees, who are to take care that the Corporation of Surgeons perform their Engagements respecting the said Collection. That a day be appointed for the annual Inspection of the Museum, by the Trustees acting collectively as a Board; and that they are also to have quarterly Meetings, for the transacting of any Business relative to the Museum, and for the filling up of such Vacancies as may happen in the number of the Trustees; and that the Corporation of Surgeons shall engage some person to officiate as Secretary to the Board upon such occasions, and to issue previous Notice to the Members, in which he is to state particularly whether any Vacancies are to be filled up by new Elections.

† This Clause was altered by the Lords of the Treasury in 1894, to the following, viz. :—

2nd. That one Course of Lectures, not less than twelve in number, on Comparative Anatomy and other subjects, illustrated by preparations from the Hunterian Collection and the other contents of the Museum, shall be given every year by Fellows or Members of the College.

a cost of about £40,000, and the Hunterian and Collegiate Collections were rearranged in what are now termed Rooms Nos. III. and IV., which were opened for the inspection of visitors in 1836.

Further enlargement of the building having become necessary by the continued increase of the Collection, the College, in 1847, purchased the extensive premises of Mr. Alderman Copeland, in Portugal Street, for the sum of £16,000, and in 1852 proceeded to the erection of Room No. V., at the expense of £25,000, Parliament granting £15,000 in aid thereof. The rearrangement of the specimens was completed, and the additional portion of the building opened to visitors in 1855. The Collection still continuing to increase and more space having again become necessary, the College in 1888 determined to erect, at a cost of £19,000, two new Museums on the western side of the old structure. These buildings, called Rooms Nos. I. and II., were completed in 1891. Besides giving greater accommodation for the Collection in general they have also provided space for the display of photographs and drawings illustrating Diseases.

The Hunterian Collection was estimated to consist of 13,682 specimens, distributed under the following heads:—

Physiological Department, or Normal Structures.

Physiological preparations in spirit	3745
Osteological preparations	965
Dry do.	617
Zoological do.	1968
Fossils:—	
Vertebrate	1215
Invertebrate	2202
Plants	292

Pathological Department, or Abnormal Structures.

Preparations in spirit	1084
Dry preparations (including bones)	625
Calculi and concretions	536
Monsters and Malformations	218
<i>Microscopic preparations</i>	215

Of the additions by which the size and value of the Collection have been so materially increased since it came into the possession of the College, very many have been presented by Fellows and Members of the College, and other persons interested in scientific pursuits. Among the largest contributions from this source have been the Collection, consisting of 847 specimens, presented in 1811 by Sir William Blizard; a valuable series of Pathological specimens presented in 1851 by Sir Stephen L. Hammick; and a Collection, presented in 1905 by Lt.-Colonel Sir Richard Havelock Charles, I.M.S., K.C.V.O., consisting of 248 skulls, and other specimens, representative of many of the Castes and Tribes of India. At the same time the Council of the College have availed themselves of various opportunities as they have occurred to purchase specimens of interest, especially at the dispersion of private anatomical and pathological museums, as that of Sir A. Lever in 1806, of Mr. Joshua Brookes in 1828, of Mr. Heaviside in 1829, Mr. Langstaff in 1835, Mr. South in the same year, Mr. Howship and Mr. Taunton in 1841, Mr. Liston in 1842, Mr. Walker in 1843, and, deserving of especial mention on account of the great number and value of the specimens acquired, those of Sir Astley Cooper in 1843 and Dr. Barnard Davis in 1880.

The Histological Collection, of which the 215 Hunterian specimens (prepared by Hewson) constitute the nucleus, was chiefly formed by the late Professor Quckett, with considerable additions by purchase from Dr. Tweedy J. Todd, Mr. Nasmyth, and Professor Lenhossek. It now contains upwards of 12,000 specimens, all arranged and catalogued so as to be readily available for reference.

In 1909 the Collection of the Odontological Section of the Royal Society of Medicine, consisting of about 5000 specimens, was transferred to the College under a Deed of Trust, and is now arranged with the other odontological specimens belonging to the College in a room specially prepared for its reception under Room II. of the Museum.

The superintendence of the Museum is confided by the Council of the College to a Committee of its Members, which Committee has held four meetings during the past year.

A summary of the progress made in the preservation, arrangement, and augmentation of the Collection will be found in the following Report.

CONSERVATOR'S REPORT.

General Pathology.

FROM the time of the preparation of the first catalogue onwards it has been customary to divide the pathological specimens of the Museum into two great groups or sections. One of these—the larger division—includes the results of injuries or diseases as they affect the various regions or systems of the body, and is arranged on a “regional” basis—a convenient, simple and practical method. In the other great division, specimens are arranged on a totally different basis. They are grouped so as to illustrate the general principles of Pathology. The latter division is, from a scientific and educational point of view, the more important and also the more difficult to render really effective and complete.

Four years ago, when the Council sanctioned a scheme for the recataloguing and rearrangement of the entire Pathological Collection in the Museum, it was to the Section of General Pathology that Mr. Shattock, assisted by Mr. Beadles, first applied himself. It was resolved to greatly extend this section and give it a prominent place in the Museum. The floor space of Room III.—one of the largest in the Museum—was cleared of its former contents, and certain specimens were moved from the shelves of the gallery and grouped on stands specially designed and made for the purpose. In recent annual reports the stages of progress have been noted, and now that the scheme, so far as it relates to the Section of General Pathology, is on the eve of completion the Conservator avails himself of this opportunity of drawing attention to this great achievement. There can be no finality in an attempt to represent in a concrete form the Principles of General Pathology. Every fresh discovery necessitates some change or some

addition. But so far as finality can be approached at any point of time, the collection formed by Mr. Shattock and Mr. Beadles may be regarded as complete and representative of our modern knowledge of morbid processes. Each specimen has been selected on account of some particular merit; every preparation has been examined, remounted and described. The histories and descriptions are recorded in the catalogues appended to each case of specimens.

The work of revision has now proceeded far enough to make this section of the Museum particularly worthy of study by medical men. As now arranged the Collection of General Pathology occupies 32 cases, and leave has been given by the council to add four more. The following list shows the main contents of each case:—

Case I. The various forms and causes of Hypertrophy.

Case II. Disturbances of growth known as Aplasia and Hypoplasia.

Case III. Causes and Forms of Atrophy.

The cases, which will contain the various forms of Carcinoma, specimens illustrating the Biology and Experimental Creation of Neoplasms and the effects produced by the introduction of foreign bodies into living tissues and organs, are now in process of being arranged.

*Physiological
Collection.*

Attention must also be drawn to the changes, additions, and improvements which are being carried out in the Physiological Section of the Museum by Mr. Burne. The Physiological Collection is really the counterpart of the series which illustrates General Pathology. The collection was designed by Hunter to show the action of living tissues in health, whilst the Pathological Series was designed to demonstrate their action in disease. It represents, by the actual organs and parts, the manner in which the various functions of the body are carried out in all types of living animals. The inception and upbuilding of a Physiological Collection has always been recognized as Hunter's greatest work. It formed the most extensive and most important part of his Museum. Every year valuable additions are made to it—as may be seen from the lists appended to this and former Annual Reports. Under the late Professor Stewart the onerous task of preparing a new Catalogue—which was urgently needed—was undertaken, and several volumes were written and published. One of these—the descriptive Catalogue of the preparations of the Central Nervous System, written by Professor Elliot Smith and Mr. Burne—is recognized by experts of all nations as one of the chief works of reference on the Comparative Anatomy of the Brain. The task of cataloguing commenced by 1914.

Professor Stewart, is being steadily carried forward, and every year sees several further parts finished—the histories of the specimens being recast, descriptive cards prepared, and guiding labels affixed to the cases. Unfortunately Hunter's point of view is not now shared by the majority of medical men or biologists. Structure is studied, not to determine function, but to discover the evolutionary relationship which exists between one animal form and another. Hence it has come about that Hunter's priceless collection is not used by the general body of medical students or of medical men to an extent commensurate with its great merits.

As regards the cataloguing of the Physiological series, cards have been prepared for all the specimens illustrating the genital system of male animals. A further part of the digestive series has been catalogued. Mr. Burne is also preparing a treatise to serve as a guide to the whole of the Physiological Collection—a work which will prove of great utility. During the last year he has written chapters on Sense Organs and Integument. These, together with guides to the Skeletal, Articular, Muscular and Nervous Systems, Luminous and Electric Organs, and Excretory Organs, have been type-written and placed in the Museum for the use of visitors. It is hoped that this work, when completed, will be printed and become available for the use of those who wish to study the collection. At the Annual Exhibition the preparations—90 in number—which it is proposed to add to the Physiological Collection will be shown. These have been made by Mr. Wm. Pearson and Mr. Burne's museum assistant, S. Steward, who has remounted many of the Hunterian preparations in a very skillful manner.

Amongst the additions to the Physiological series may be mentioned the following:—A collection of Otoliths from 35 species of fishes, presented by Colonel C. E. Shepherd; preparations illustrating his observations on the formation of shells kindly supplied by Professor Ariëns Kappers; an interesting preparation presented by the Colombo Museum showing a Siluroid fish in which the eggs are kept in the mouth for protection.

*Other Sections
of the Museum.*

It is unnecessary to deal in any detail with the other sections of the Museum. As the appended lists show, additions have been made to all the sections—Human Anatomy, Human and Comparative Osteology, Teratology, Gynæcology, and Regional Pathology.

*Special
Collections.*

During the present year Mr. Arthur Cheatle has written, and has had printed at his own cost, a descriptive catalogue and guide to the collection of specimens which illustrate the Surgical Anatomy and Pathology of the Ear. The catalogue is provided with a full and classified index so that visitors and students can readily obtain the information of which they are in search. It will be remembered that by far the larger part of the Ear Collection was formed by Mr. Cheatle and presented by him to the College three years ago.

In the Odontological Section Mr. Colyer has made many additions and carried out several improvements. During the past year 31 specimens have been added, many of which are of more than passing interest. Through the generosity of the Royal Society of Medicine a case has been added in which specimens of the Comparative Dental

Pathology Section are now displayed. The numbering of the specimens on the decimal system has been completed. It is gratifying to note that this part of the Museum is being used more and more.

Under the care of Mr. Stephen Mayou the series of specimens which illustrate the Injuries and Diseases of the Eye is increasing. A catalogue for this part of the Museum will be ready for use at an early date.

*Collection of
surgical
instruments.*

Mr. Alban Doran has completed a descriptive catalogue of the large collection of obstetrical instruments. There are over 160 specimens, including 56 obstetric forceps. The majority belong to the Loan Collection deposited in the Museum by the Royal Society of Medicine. The catalogue has been typewritten, and a copy is placed in the Museum for the use of visitors. Mr. Doran is now engaged on the catalogue of the Gynæcological Instruments, which include an instructive series of trocars, clamps, and other appliances presented to the College by Sir T. Spencer Wells and other pioneers in this department of surgery. It would be impossible to speak too highly of the industry and scholarship which Mr. Doran is placing at the service of the College, and it is hoped, when he has completed his task, that the results of his labours may be published and thus made available to all who are interested in this particular branch of surgery. Mr. Doran has also supplied descriptions of the various specimens added to the Gynæcological series during the past twelve months.

As will be seen from the list of donations many additions have been made to the collection of surgical instruments. The President has given two of Lord Lister's spray producers and a roll of iac plaister.

Mention may be made at this point of a welcome innovation sanctioned by the Council in the spring of the present year—temporary exhibitions of specimens of surgical and medical interest in the Hall of the Museum. The collection of Appliances employed in the operative treatment of fractures, organized and arranged by Mr. Hey Groves in February last, was visited and studied by a large number of surgeons, and served a most useful purpose.

*Change in the
staff.*

The Conservator records with particular regret the retirement of Mr. William Pearson, prosecutor to the College, who leaves, after a service of $57\frac{1}{2}$ years, on account of his health. William Pearson represents the third generation of a family which has devoted itself wholeheartedly to the service of the Museum and of the College. His grandfather, Edward Pearson, was engaged as a porter in the Museum in 1804, when Mr. Clift, who was then Conservator, was arranging the Hunterian Collection in the premises then acquired by the College of Surgeons in Lincoln's Inn Fields. Edward Pearson died in 1857, after 53 years of service. His son Thomas, William Pearson's father, was engaged for the Museum in 1837, and continued in the service of the College until 1880, when he retired on a pension, after serving the College for 43 years. William Pearson was engaged as a lad of seventeen at Michaelmas 1856. At that date Professor Quekett succeeded Sir Richard Owen as Conservator. William Pearson worked under Professor Quekett, Sir William Flower, Professor Stewart, and the present Conservator during a period of $57\frac{1}{2}$ years. His grandfather and he together have given the College a continuous

service of 110 years, for Edward Pearson died on duty a year after William had been at work. The collective service of the three generations to the College represents a period of 153 years. Of his surpassing abilities as a dissector there is no need to write; the preparations which crowd the tables and shelves of the Museum are justly esteemed by anatomists and medical men throughout the world.

Research.

Mr. Shattock and the Conservator have made further enquiries into the condition of the genital glands in cases where a change has taken place in external sexual characters. In this connexion a "mule" pheasant, graciously presented to the Museum by His Majesty the King, is of interest. In most cases a "mule" pheasant is a hen bird which has assumed, to a greater or less degree, the plumage and characters of a cock bird. A change can usually be detected in the ovaries of such birds, part of the ovary being replaced by tissue of a testicular nature. In the case just mentioned the partial assumption of the male plumage was evidently due to another cause. Vestiges of two glands, probably representing ovaries, were present, but as there were neither oviducts nor testicular ducts developed, the present instance must be regarded as an asexual or neuter bird.

The Conservator and Assistant Prosecutor, Mr. Henry Wilson, have made elaborate microscopic examinations of the great bowel in cases where that organ has been excised on account of intestinal stasis. Sir Bertrand Dawson and Prof. J. W. Smith have been very helpful in providing specimens for the purposes of this enquiry. Certain definite lesions of an uncertain significance have been recognized.

Complete examination of the glands of internal secretion have been made in fetuses and animals in which morbid conditions of the skeleton were present. We obtained through the kindness of Mr. Matthew C. Corner a full-time child, stillborn, which was the subject of an uncommon defective development, especially of the osseous system. Externally it had the appearance of an achondroplastic child, but the pathological changes differ from those of achondroplasia. The Medical School of St. Thomas's Hospital, through Mr. Shattock, presented another specimen showing exactly the same condition. Subsequently we learned that the condition had been described as a definite disease by C. Porak and G. Durante (*Nouv. Iconographie de la Salpêtrière*, vol. xviii. 1905, p. 481).

Further investigations on the structure of the ear and mechanism of hearing have been made in conjunction with Sir Thomas Wrightson, Bart.

Dr. Martin Berry is examining certain groups of human crania by means of X-rays in order to determine the more common variations in the arrangement of air-sinuses opening from the nose, and also the poise of the head which gives the clearest view of their size and form.

A considerable number of medical men have used the Museum for the purposes of research.

The names of donors to the Museum will be found in the lists of additions printed at the end of this report.

Some of the more important gifts require special mention. Dr. Keating, C.M.G., Director of the Egyptian Government School of Medicine in Cairo, has presented to the Museum, on behalf of the Egyptian Government, a series of anatomical specimens, prepared by

Dr. Wahby, Professor of Anatomy in the School at Cairo. Professor Wahby's specimens were exhibited in the Museum of the International Medical Congress, held in London in August 1913, where they attracted much attention. They are technically known as "corrosion preparations," and illustrate, in a novel way, structural details of the human and animal body.

Another series of specimens, also exhibited at the International Medical Congress was presented to the College by the Department of Agriculture, Washington, U.S.A. These specimens, in the opinion of Dr. Edwin E. Smith, by whom they were prepared, demonstrate the occurrence in plants of tumour formations of a malignant nature.

The London School of Medicine for Women has presented preparations of the urogenital system of mammals, made by Dr. Wood Jones, to show certain novel features—particularly the manner in which the vagina of the common Mole is formed when the animal has reached its second year.

A gift of historical value has been given by Mr. E. T. Newton, F.R.S. For the last thirty years the progress in our knowledge of Embryology has depended, to a large extent, on what is known as the "reconstructional" method—the method of modelling microscopic sections in wax and of building up from these wax-plates an enlarged model of the original object—a minute embryo or organ. Professor Born is credited with the invention of this method, which, however, was independently elaborated and employed by Mr. Newton in England at a somewhat later date. Mr. Newton has presented the first model he made—one illustrating the detailed anatomy of the brain of the common black beetle.

The Archaeological Survey of Nubia and the Egypt Exploration Fund have continued their liberal support. The former has given a collection of Egyptian skulls belonging to the IInd and IVth Dynasties—a welcome gift, because the people of those periods were formerly unrepresented in the Museum. Two of the specimens presented by the Nubian Archaeological Survey, through Professor Elliot Smith and Dr. Derry, are of unusual interest. One is a bronze arrow-head embedded in the 6th cervical vertebra of an ancient Egyptian. The weapon has pierced the body of the vertebra from the front and penetrated far enough to completely divide the spinal cord. The other specimen is a piece of tattooed skin from a mummy. Although the body from which the skin was removed had been in its grave fully 4000 years, the pattern of the tattooing can be plainly seen. In an adjoining grave was found a small clay figure showing tattoo marks of a similar pattern.

Mr. H. A. T. Fairbank has presented a much-needed specimen—one to illustrate the structural changes which occur in congenital elevation of the scapula—"Sprengel's shoulder." In his specimen the deformity is present on both sides and is accompanied, as is usually the case, by a malformation of the cervical and upper dorsal vertebræ. Dr. Reginald Morton was able to supply several stereoscopic radiographs of this anomaly. Dr. J. Kingston Barton presented radiographs of a remarkable case in which the clavicles are undergoing absorption.

Acknowledgement must also be made of the help given by the authorities of all the metropolitan medical schools in obtaining specimens and material needed for the Museum.

Dr. H. Fraser, Director of the Medical Research Institute, Kuala Lumpur, sent to the Museum tumours of a teratomatous nature removed from a Gibbon—the first instance of tumours of this nature occurring in the body of an anthropoid ape.

Mr. H. Morriston Davies, who has been investigating the age changes which occur in the cartilages of the first pair of ribs, has supplied the Museum with specimens showing various new facts observed by him. For other donations to the Pathological series, the College is indebted to Dr. F. J. McCann, Mr. J. D. Malcolm, Sir Frederic Eve, Capt. V. B. G. Armytage, I.M.S., Dr. John Baker, Dr. R. Henslow Wellington, Dr. H. A. Lediard, Mr. Hugh Rigby, Mr. James Sherren, Dr. H. M. Turnbull, Dr. Wilfred Balfour, Dr. Edward Tait, Dr. Hammond Smith, Mr. Matthew C. Corner, Mr. Frank Corner, Dr. F. W. Collinson, Dr. Penrose Williams, Dr. W. T. Hillier, Dr. Alistair, Dr. J. Cowan, Mr. Albert Carless, and Mr. Campbell Williams.

Thanks are also due to Mr. J. Reid Moir, of Ipswich, for the gift of many valuable specimens—particularly of human remains belonging to early periods.

Dr. Eric J. Marshall has presented a very perfect example of the skull of a crab-eating Antarctic Seal.

To Dr. H. G. F. Spurrell, Mr. Leon Williams, Prof. A. Watson, and Professor William Wright we are indebted for additions to the section of Comparative Anatomy.

*Human
Osteology and
Anthropology.*

During the present year it has been possible to obtain a much needed addition to the Museum—a collection to represent the condition of the skeleton (particularly of the jaws, teeth, and skull) of modern English people. As our knowledge of the ancient inhabitants of England increases, it becomes more and more apparent that certain definite changes have occurred in the physical condition of the people in recent centuries. The difficulty in determining the nature and the exact extent of these changes, especially as they affect the skull, face, jaws, and teeth is due, not so much to the lack of accurately dated remains belonging to remote periods, as to the want of an adequate collection of modern remains to serve as a standard for comparison.

Further additions have been made to the collection of Ancient British Remains. The Prehistoric Society of East Anglia has investigated the ancient pits known as “Grime’s Graves,” near Weeting, in Norfolk. They are believed to have been dug at the commencement of the Neolithic period or towards the close of the Palæolithic age. During the exploration of these ancient pits—which represent mines worked to obtain flints suitable for the making of implements—two discoveries of human remains were made: one the calvaria of a man, the other the skeleton of a young child. The remains undoubtedly belong to people of the period in which the mines were worked. The calvaria is of the same type as that of the skulls found in similar pits at Cissbury, which were described by the late Professor Rolleston. These ancient remains have been presented to the Museum by the Prehistoric Society of East Anglia and by Mrs. Hall, the owner of the estate on which “Grime’s Graves” are situated, in order that they may be available for study by those interested in prehistoric races. Sir James Moody

has added the human remains found in an Anglo-Saxon burial-ground to other collections of a similar date now in the Museum. In the course of time it ought to be possible to form a very definite picture of the physique of the early Anglo-Saxon inhabitants of England.

A number of important additions have been made to the collections representing the peoples of Africa. Mr. P. A. Talbot, Resident Commissioner in Southern Nigeria, was able to obtain for the Museum a small collection of skulls of the people living to the east of the delta of the Niger. From a region further to the north, Mr. N. W. Thomas, Government Anthropologist in Northern Nigeria, obtained samples of a different Negro race. Thanks to the efforts of Captain Anderson and of Professor Elliot Smith, material has been obtained for the study of Negro tribes living in the Soudan.

A specimen of particular interest was presented by Mr. Barrington Nash—an authentic cast of the skull of Robert Burns. So far as is known, only two casts are in existence.

Three casts illustrating the manner in which trephining was carried out amongst the Neolithic tribes of France have been received in exchange. It is greatly desired that search should be made for instances of prehistoric trephining in England. Dr. T. Wilson Parry has presented a set of preparations made by himself to show the implements and methods of trephining practised by people in a stage of Stone culture.

Visitors and Students.

There is a considerable decrease in the number of visitors, partly due to the precautions which have been taken to admit only those who come for the purpose of serious study or enlightenment. Last year the total number was 13,188; this year it is 11,272. Of these 4291 came on Fridays and Saturdays, when the Museum is open to women. On the other hand, there is an increasing demand on the part of Ambulance Classes, Technical Institutes, Scientific and Natural History Societies for admission on Saturday afternoons, when, as has been the case since Sir William Flower was Conservator, special permits are issued for a certain number of months in the year. By granting permission to such classes the College performs a public service. During the past twelve months special classes have been admitted on 31 Saturdays. On these occasions William Finerty, Foreman in the Museum, is in charge during the hours the Museum is open. The arrangements for the classes are carried out by Mr. Charles Seragg, under the direction of the Conservator.

Workrooms.

Formerly the Articulator carried out his work in a large but indifferently-lighted room in the basement. With the consent of the Council, a large room on the upper work-floor of the Museum, formerly used for the storage of specimens, has been cleared and fitted out to serve as a work-room for the Articulator and attendants when not on duty in the Museum. Space is also reserved for the use of students carrying out special investigations in connection with the Museum. The store specimens, formerly kept in the upper work-floor, have been transferred partly to the Pathological Store-room and partly to a room in the basement.

Electric lighting has been introduced into the work-rooms and the former gas-fittings removed. The change is an improvement in every way, giving greater safety to the Museum and better facilities for carrying out work in the evening.

A Wheatstone Stereoscope and an improved form of camera lucida have been purchased. A very useful gift is the projecting drawing apparatus given by Sir Thomas Wrightson, Bart.

THE LIBRARY.

THE Library of the College dates from the year 1800, in July of which year the first grant of a sum not exceeding £50 was made for Library purposes. It had been the intention of the old Corporation of Surgeons to form a Library, but they failed to carry their intention into effect. In its early years the Library was considerably increased by presentations and bequests of books—the principal donors being Dr. Baillie, Sir Everard Home, Sir Charles Blicke, the widow of Mr. Sharp, Sir Ludford Harvey, Dr. Fleming, Mr. Cotton, and Mr. Long. The Court of Assistants also directed from time to time the expenditure of small sums of money for the purchase of books. Sir Charles Blicke, in the year 1816, invested the sum of £300, the proceeds of which were to be devoted to the same object. By these means extensive purchases were from time to time made from the libraries of Mr. Pitt, Mr. St. André, Sir Anthony Carlisle, and others. The progress of the Library, however, for the first twenty-six years of its existence was very slow, but in 1827 great efforts were made to put it in a thoroughly good condition; in that and the two subsequent years the sum of £5269 was spent in the purchase of books, and in 1829 the first Librarian was appointed. The College was practically rebuilt by Sir Charles Barry in 1835–36, and during that period the Library was closed, the books being packed in cases and stored in the Museum Gallery. On the 15th of February, 1837, the Library was re-opened, the rooms in the new building allotted to this department being the Reading-Room and the Librarian's Room. From this date until 1888 very little extra accommodation had been provided for the Library, a small Committee-Room had been fitted up with shelves and room made for a few books under the Theatre.

The munificent gift of Sir Erasmus Wilson enabled the Council in 1888 very materially to increase the Library accommodation, and at the same time to improve and re-decorate the existing building. The residence of the Conservator of the Museum at the east end of the College was pulled down, and the building erected on its site was devoted to Library purposes. On a level with the old Reading-Room an extension was built, the two rooms being connected by four archways, two on the ground and two in the Gallery. Beneath this a handsome Book-Room was provided, and below that a spacious Store-Room. The new building, as at present shelved, gives accommodation for 26,000 volumes. The Librarian's Room was considerably improved by throwing into it a loft above the old ceiling and a passage which led into the Reading-Room.

The whole of the Library premises were re-decorated, and the Electric Light was installed throughout. The heating apparatus, which was under the floor at the south side of the Library, was all removed, and in its place a coil of hot-water pipes

was placed in each window. The gallery railing, being in an unsafe condition, was replaced by one of a stronger pattern.

This extension of the Library made it possible to re-arrange the books in such a way as to make them more accessible to readers. In the Gallery of the Extension stand the books on Anatomy, Physiology, Pathology, Medicine and Surgery; round the Reading-Room are ranged sets of the Periodicals and Transactions in greatest demand. There is also a good collection of dictionaries, encyclopædias, systems and general books of reference, conveniently arranged for the use of readers.

The lower room contains books on Chemistry and Physics, Materia Medica and Therapeutics, Forensic Medicine, Diseases of Women and Children, History of Medicine and Surgery, Biography and Bibliography. The basement is devoted to old sets of Journals and Transactions, a collection of Theses, and to miscellaneous books.

The Librarian's Room contains the books on Biology, and certain valuable works, including many Early Printed Books, which are kept in glass cases.

The current numbers of the Journals are displayed on tables down the middle of the Reading-Room: four of these are fitted with sliding trays, in which books too large for the wall-cases, and illustrated works still in progress, are kept. The new books are placed on a stand in the centre of the Room: these are catalogued directly they are received, and are at once available for readers. A list of the additions is posted in the Library.

The first Catalogue of the Library was issued in 1831. A classed Catalogue was prepared by Dr. Willis, and was in use in MS. for some years; in 1838 a synopsis of it was printed, and the work itself was published in 1843. In 1853 an index of subjects was issued, and four supplements to the Author Catalogue were published between the years 1840 and 1860. In 1890 a List of Transactions, Periodicals, and Memoirs in the Library was published. A new Catalogue of Authors and Subjects is now being prepared on cards; these are kept in cabinets at the west end of the Reading-Room, and are available for use by the readers. When the work is finished the cards can be used as copy for the printers.

The Library is particularly rich in the Transactions of Societies, and in Periodicals relating not only to Medicine and Surgery, but also to the accessory sciences. The large illustrated works on Zoology, Anatomy, &c., are also well represented. There is a good collection of Portraits of Members of the Medical Profession.

In December 1892 a Common Room for the use of Fellows and Members was opened in the Reading Room adjoining the Entrance Hall.

A new Store Room for books was fitted up in the basement in 1901, and in 1907 a new room with an annexe was added in proximity to the gallery of the large Library.

During the past year the supply of books and periodicals has been well kept up.

The Donations show an increase in number, and the Librarian desires to take this opportunity of thanking those Fellows and Members who have kindly presented copies of their published works in accordance with his request in the last Report.

The Donations include portraits for the Book of Honorary Fellows from the following: Sir Henry Norbury, K.C.B., Professors Fuchs, William J. Mayo, Harvey Cushing, Hartmann, Monprofit, Körte, Geh. Med. Rat. Dr. Bier, Professors Shepherd, Tuffier, Crile, Nicolaysen, Bastianelli, Dr. John B. Murphy, Prof. Freiherr von Eiselberg (with forty reprints of his works).

6. The grounds upon which the Prize is awarded shall be made public at the time of the award.

7. The Prize shall be open to foreigners as well as to British subjects, and the Committee shall not be restricted in any way as to the selection of persons qualified to receive the Prize, with the exception that Members of the Council shall not be eligible.

NOTE.—It is not intended that Essays should be submitted in competition for this Prize, or that those who are anxious to obtain it should be called upon to submit their names as Candidates. It is hoped, however, that the knowledge of the reward which may be obtained, and the distinction which it will confer on its recipient, will prove an incentive to those who are occupied in the study of this disease.

John Tomes Prize.

1. The John Tomes Prize shall be awarded triennially.

2. The Prize shall consist of the amount of the interest accruing from the John Tomes Fund during the triennial period (about £29). A document, declaratory of the award, sealed with the College Seal, and signed by the President, shall be presented with the Prize.

5. The Prize shall be awarded by the Council on the recommendation of a Committee at the Quarterly Meeting of the Council in the April following the expiration of the triennial period. The Council shall, however, withhold the Prize if, in the opinion of the Committee, no work within the prescribed time be of sufficient merit to justify its award, and in such case shall either invest the dividends to augment the capital of the Fund, or adjudge the Prize to the author of some original research, deserving recognition, in other than dental subjects which may have been carried out by any person eligible for the Prize.

6. The Committee shall consist of five members, and shall be appointed by the Council not less than one year prior to the date of the award of the Prize. The Committee shall not of necessity be confined to Members of the Council.

7. No essays shall be submitted in competition for the Prize in the case of the next award, which shall be for the period ending the 31st December, 1914: but it shall be open to the Committee to recommend to the Council that essays should be called for before any subsequent award.

Cartwright Prize.

1. The Cartwright Prize will be awarded quinquennially, and the next award will be for the five years ending 31st December, 1915.

2. The Prize consists of a Medal executed in bronze and an honorarium of £70.

(*A Diploma or Licence in Dental Surgery without a Medical or Surgical Diploma or Degree will not be a sufficient qualification.*)

5. The Prize will be awarded to the author of the best essay written in English upon the proposed subject, if such essay is considered of sufficient merit.

6. Every essay must have a motto or device and must be accompanied by a sealed paper containing the name and address of the author, and having on the outside a motto or device corresponding with the motto or device on the essay.

7. Each essay must be addressed to the Secretary of the Royal College of Surgeons of England, and delivered at the College not later than 4 o'clock p.m. on the 31st December, 1915.

8. The manuscript Prize essay and every accompanying drawing and preparation will become the property of the Royal College of Surgeons of England.

9. Every unapproved essay which is unclaimed at the expiration of twelve months from the date of its receipt will be returned, with any accompanying drawing and preparation, to the author thereof at the address given in the sealed envelope.

Begley Studentship.

1. The Begley Studentship shall consist of the dividends derived from the Begley Bequest, viz.: £20 per annum, and shall be tenable for three years, subject to the conditions hereinafter mentioned.

2. The Studentship shall be awarded in April 1915, and thereafter triennially, or at such time as any Studentship may become vacant.

3. The Studentship shall be open, on the occasion of the fourth award, to any Candidate admitted to the Second Examination of the Conjoint Examining Board in England held in April 1915.

4. The Studentship shall be awarded to the Candidate, if any, obtaining the highest number of marks in the Anatomical part of the Examination.

5. If two or more Candidates in the Anatomical part of the Examination shall obtain an equal number of marks, being with respect to the other Candidates the highest number of marks obtained by any Candidate, reference shall be made to the marks obtained by them respectively in the Physiological part of the Examination, and on the combined result the adjudication shall be made; and, if their marks shall still be equal, it shall be open to the two senior Examiners in Anatomy appointed by the Royal College of Surgeons to call upon such Candidates to present themselves for further examination, or to take such other steps as may enable them to adjudicate in the matter.

6. The Examiners shall report their adjudication of the Studentship to the Council at the Meeting of the Council next succeeding the Examination.

7. The Stipend shall be paid yearly, and the Student shall receive the first instalment within three months after the award of the Studentship.

8. The Student shall be required, before payment of the second and third instalments respectively, to send to the Secretary of the Royal College of Surgeons of England a Certificate from the Dean of his Medical School to the effect that his conduct has been satisfactory and that he has been applying himself diligently to his studies, and should any Student fail to comply with this requirement he shall forfeit his Studentship and all future payments in respect thereof.
